

Infinigate at it-sa 2025: strong focus on OT security, new services and partner enablement.

Tuesday 9 September, 2025

The cybersecurity VAD will be showcasing a broad portfolio of IT and OT security solutions in partnership with 15 leading technology vendors, highlighting the new Infinigate Attack Prevention Service.

Haar, 9 September 2025. The [Infinigate Group](#), a leading technology platform and trusted advisor in cybersecurity, cloud and network infrastructure, is once again showcasing a broad portfolio of market-leading IT and OT security solutions at this year's [it-sa](#) Expo & Congress, from the 7th to the 9th of October in Nuremberg, Germany. Visitors to the world's leading trade fair for IT security will have the opportunity to find out about the latest solutions, products and, above all, the greatly expanded range services offered by the cybersecurity value-added distributor, and to talk to experts by visiting Infinigate in **Hall 7, stands 7-336 and 7-342**.

Infinigate will be demonstrating pioneering technologies and value-added services in partnership with 15 vendor partners and co-exhibitors: Armis, Barracuda, Forcepoint, Fortra, HPE, N-able, Progress, Ruckus Commscope, Sekoia, Sophos, Swissbit, Thales, Trellix, Versa Networks and Yubico.

The daily programme offers product updates, panel discussions with technology experts and networking opportunities to discuss key IT security issues. Infinigate will be focusing on the topics of OT security, technology services and partner enablement, specifically addressing current challenges:

- **OT security:** practical insights into the protection of critical infrastructure, with access to an integrated OT lab.
- **Technology Services:** experts on hand to provide tailored advice on all offerings – from technical empowerment and design/consulting to rollout and on-site implementation to regular operations as part of a white label process.
- The highlight will be the launch of **Infinigate's Attack Prevention Service (APS)**, developed in close cooperation with [antago](#), provider of expert consulting and in-depth analysis in the field of information security. This service, to be unveiled for the first time at it-sa, enables planned attacks to be detected and prevented, resulting in a substantial reduction of cyber-attacks.
- New partner marketing services tailored for **SME** oriented resellers will be a focus topic. These services can facilitate and accelerate the marketing of modern security solutions, generating valuable customer leads for partners.

As it is tradition, the VAD will be hosting two evening parties at its stand – on 7 October, sponsored by WatchGuard and on 8 October sponsored by Fortinet.

In keeping with this year's focus, Infinigate will host the following workshops:

'OT security in practice: lifecycle, standards and solutions at a glance' on 8 October, 9:30 a.m. to 12:30 p.m., providing important information for security managers.

Infinigate Attack Prevention Service (APS) will take place on 7 and 8 October.

"As the leading trade fair for IT security, it-sa is an important platform for us to showcase our technical expertise, our services and our strong partner network," explains **André Stark, Managing Director of Infinigate Germany and Austria**. "Here, we not only present our extensive portfolio, but also the innovative strength that results from close cooperation with our vendor partners. In this way, we support our resellers and managed service providers in their growth and in opening up new markets."

"With the Infinigate Attack Prevention Service (APS), we are taking IT security services to a whole new level and continuing to develop as a leading platform for cybersecurity solutions. We are also breaking new ground in partner marketing, further leveraging our innovative strength. Together with our partners, we are creating sustainable added value and differentiation and strengthening the resilience of companies against ever-growing, modern cyber threats," says **Falk Schwarzenberg, Managing Director at Infinigate**.

Further information on Infinigate's trade fair's participation can be found [here](#). André Stark, Managing Director of Infinigate Germany and Austria, Falk Schwarzenberg, Managing Director of Sales at Infinigate Germany, Patrick Scholl, Head of OT at Infinigate Germany, and Christian Ederer, Director of Technical
