Intelligent tech finds your perfect Tablet PC

Thursday 9 January, 2014

2014 is projected to be a huge year for Tablet PCs. SlickSearch.com has just been launched to help everyone - from child to granddad - navigate their way through the tablet jungle. Tablets ideally suited for students can be instantly filtered just by choosing the 'Perfect for Students' option. Anyone looking for a decent and powerful Windows 8 tablet need to just hit 'Best Windows 8 Tabs'. Simiarly, 'Best For Kids', 'Perfect for the Family' and several others. So, much more than a blast of complicated specs, SlickSearch intelligently and continually updates all it's pre-defined categories as and when tablets are released. There's another category worth a special mention called 'Uniquely Designed', which shows some of the weird & wonderful deviations now in vogue in the tablet world. However, if these categories aren't enough, there's over a dozen filters to wade through the 150+ tablets and rapidly hone in on the best tablet. It's quite interesting to see tablets now that have both Windows 8 and Android (Ativ Q), a screen on the outside **as well** as the inside (Asus Taichi) and even 27" displays (Lenovo Horizon)! But best of all are the nify animations SlickSearch uses, making the whole thing so easy even a child could use it.

The engine that powers this site has already proven to be immensely useful to tablet-seekers as it's also used in another site (GetTechSpecs.com), which Google UK ranks #1 for the term 'tablet specs'. Although created by the same founder, SlickSearch now builds on those foundations and is bigger, better and slicker.

Unique to SlickSearch is the in-depth research gone into each tablet's specs, organising this data in a semi-structured way and giving the best user experience to all age groups. For example, as well as the categories mentioned, it's uniquely positioned to answer questions like :-

> Which tablets come in Pink, making it that perfect gift for a daughter?
> Which Windows tablets come with a detachable keyboard and stylus/digitizer - perfect for students?
> What's the best price of **specifically** the 32GB-Black-3G iPad Air across hundreds of UK retailers?
> What are people saying about this tablet at this moment?

To help tablet-seekers get started, attached is an infographic* showing a subset of ~50 tablets and some key dimensions for each. This is less than a third of the tablets on the site so it's definitely worth giving SlickSearch.com a visit before deciding on exactly which one is best.

One thing's for sure though - it's becoming apparent ever more that today there are some compelling alternatives to the iPad.
