Intelligent Voice brings Audio Review to ZyLAB's eDiscovery platform

Monday 21 October, 2019

London, 21st October 2019 – Intelligent Voice are delighted to announce their partnership with ZyLAB to integrate speech review into ZyLAB's eDiscovery platform.

IV's solution is already successfully helping law firms and government agencies around the world to ingest, transcribe, analyse and review vast amounts of audio, in a secure environment, freeing up valuable lawyer time and cutting down on costs. By providing connectors and APIs to ZyLAB's legal platform, IV's solutions make audio review as easy as reviewing any other document.

The IV software lets users ingest and search vast quantities of audio securely using its unique ultra-high-speed GPU powered speech recognition algorithms. Working across more than a dozen languages and dialects, IV's market leading SmartTranscript™ technology cuts review time by 70%.

Yaron Goldstein, CTO of ZyLAB: "Audio files and video recordings are making up for a large part of the data that needs to be reviewed in legal fact-finding missions. The integration of IV's speech review software in our eDiscovery platform allows our customers to directly review these video and audio files, saving them valuable time in the review process."

"We believe that ZyLAB's approach to audio and video review places them in a leadership position in the eDiscovery space, and we are delighted to be working with them," says Nigel Cannings, CTO

For more information on our partnership and our work bringing audio review into ZyLAB please email us at info@intelligentvoice.com or call 0203 627 2670 or info@zylab.com or call +31-20-7176500.

About Intelligent Voice®

Intelligent Voice Limited is a global leader in the development of proactive compliance and eDiscovery technology solutions for voice, video and other media. Its clients include government agencies, banks, securities firms, Call-Centres, litigation support providers, international consultancy, advisory businesses and insurers, all involved in the management of risk and meeting of multi-jurisdictional regulation.

Fundamental to its success, its patent-pending and patented technologies Intelligent Voice and JumpTo™ are developed by a team of dedicated researchers and system engineers based in the UK. Ownership of the core technology resides with Intelligent Voice. Intelligent Voice continues to lead the market and will maintain its strengths in the areas of thought leadership, innovation, R&D and providing solutions to its clients.

The Company is headquartered in the United Kingdom and has been providing market leading solutions since 1990.
