

INTRODUCING A REVOLUTIONARY AND INNOVATIVE DEDICATED TERMINAL FOR ANIMALS IN ISRAEL'S BEN GURION AIRPORT: Terminal 4 -Pets the Ben Gurion Animal Reception Center (ARC)

Thursday 18 July, 2019

Terminal4Pets, the Israeli agency for international pet transportation, is pleased to announce that it has been chosen to plan, build and operate the new terminal for animals in Israel's Ben Gurion Airport: Terminal 4-Pets.

Terminal4Pets was founded by Dr Eytan Kreiner in 1990 to provide a full range of services for people traveling around the world with their pets.

Worldwide approximately 80 million animals fly annually. Within the last year about 50,000 pets, the vast majority being dogs and cats (also various species of birds and rodents growing annually) flew in or out of Israel from all around the world. With an average of 7% annual growth.

We are excited to announce that the dream that has been in planning for 10 years by the entrepreneur Dr. Eytan Kreiner, born first and foremost as a result of loving animals and caring for their well-being, is taking shape. The project is the result of meticulous planning, creative thinking and vision.

The Israeli Animal Reception Center (ARC) Terminal 4-Pets is being built on 5 Dunams and will include 1,500 square meters of kennels and office space and have a capacity for occupancy of 150 dogs and 50 cats.

The ARC will provide pet accommodation and specialized services for pets arriving or departing from Ben-Gurion Airport 24 hours a day. Flying with your pet, traveling with your pet, relocating with your pet? Pet shipping services including boarding, ground handling, manifested cargo freight services, transit services, veterinary care, VIP services, flight kennel shop, grooming, training center, emergency services, and more, all conveniently located near Terminal 1 at Ben Gurion Airport.

Ecological planning has also been invested in Terminal 4 -Pets, emphasizing on one hand the need for comfortable kennels for animals that meet all their needs and on the other hand solutions for maintaining a hygienic and pleasant environment for all visitors of the ARC. Creative solutions for noise and accessibility issues were also taken into consideration.

As part of the ARC's program to integrate people with disabilities into the work force, the ARC will employ special needs personnel amongst the staff.

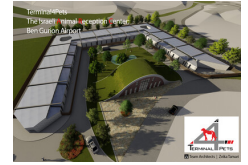

Terminal 4 -Pets, currently in the planning stage, is scheduled to open for our four legged friends flying in the summer of 2020. The Israeli ARC will be joining large terminals for animals already in the world, such as London, Frankfurt, and New York. The ARC will provide easy and fast services available for pets arriving and departing from Ben-Gurion airport. With the establishment of the ARC, the state of Israel will join the most advanced countries in the world already using the services of similar centers.

Dr. Eitan Kreiner, a graduate of Veterinary Studies from Glasgow University in Scotland, a veterinarian with over 30 years of experience, a world-renowned lecturer in the field of pet shipment, entrepreneur and "Chief Flight Veterinarian", serves as the company CEO and advisor to Israeli and global bodies on the development of the field of pet shipment and its future.
