Introducing the new Home Hub seating system from Furniture Village

Thursday 20 October, 2011

Furniture Village is excited to announce the arrival of the new **Home Hub** luxury range of sofas and chairs - the perfect addition for the ultimate bachelor pad!

Made exclusively for Furniture Village, then Home Hub range includes a 4 seater corner sofa with chaise which boasts a futuristic secret cooling or storage compartment and if thats not enough, the range also includes a state of the art leather swivel chair with an in-built integrated Bluetooth speaker system.

Ideal for the modern man, the Home Hub range has been designed with comfort and convenience in mind. The swivel chair allows the customer to wirelessly listen to music or audiobooks in the comfort of their own home via a speaker system which is astutely hidden under stylish leather, ensuring the contemporary design of the chair is not compromised.

As well as having in-built surround sound, the new seating system allows people to grab a chilled drink without even leaving the comfort of their sofa. The sophisticated cooling compartment within the sofa includes a cup holder - ideal for chilling a beer or two!

The range is available in more than 30 different colours and can be purchased in individual modular units or as a complete set.
The normal retail price of the Home Hub swivel chair is £999; however, in the Furniture Village sale which launched last week, there is **35% off** this price - making it just £649.

The Home Hub 4 seater corner sofa with chaise normally retails at £2,899, but with **30% off** in the sale, its now just £1,955.

To view the whole range, visit one of the 39 Furniture Village stores nationwide or visit the sofas and chairs section online at **www.furniturevillage.co.uk**
