Professional Skincare Pioneer - Eve Taylor OBE, developed TEEN-SKIN ACTIVES because many of today's products often contain "Harsh exfoliants and chemicals that can de-stabilise and create problems by removing more of the skins naturally protecting layers than is absolutely necessary.

With excess sebum production during early teens, many can develop into blackheads leading to potential stretched pores and scarring.

The use of harsh chemicals and exfoliants can often increase sensitivity, which could send the skin into a 'distressed' state

TEEN - SKIN ACTIVES® Products:

- Encourages normal sebaceous secretions

- Are anti-bacterial and soothing.
- Utilize natural ether oils obtained by Tea Tree, lavender and lemongrass to cleanse, detox and help balance the skins condition.

- Are colour coded for easy recognition
