John Weiss offers 10% introductory discount on the Tecfen range, to celebrate new UK Distributor status

Friday 21 February, 2020

Harlow, UK – 21st February 2020 - John Weiss & Son, the leading manufacturer and distributor of gold-standard ophthalmic micro-surgical instruments and procedures, is proud to be appointed the Exclusive UK Dealer of the Tecfen Medical corneal trephine blade portfolio and an Authorised UK Distributor for the Tecfen Medical range of tissue punches.

To celebrate this new partnership, John Weiss & Son is pleased to offer a **10% introductory discount** across the **entire Tecfen product range**. This special price promotion is valid immediately and will be available until 31st March 2020. Please call **01279 456256** and quote **TECFENQ120** to receive the 10% discount.

Tecfen Medical offers a comprehensive selection of corneal trephine blades and tissue punches, including the; complete Corneal Punch System & Components (used with the Long Trephines series for donor or recipient), the Vacuum and Non-Vacuum Trephine Punch series (for donor) and the Radial Vacuum Trephines series (for recipient).

The Corneal Punch System is supplied sterile and includes a Punch Piston and a Piston Holder & Base Plate, where a separately packed sterile and disposable Teflon corneal block fits. The Corneal Punch Piston is designed to hold the Long Trephine Blades when used by hand as a punch to cut the cornea from the donor. The Punch Piston is available in three size; 5-7mm, 7-9mm and 9-11mm.

Long Trephine Blades (for donor or recipient) can be used by hand or with a hand piece, such as the Tecfen Corneal Punch system, and are compatible with most punch systems. They deliver consistent results and range from 2.5 - 18mm in diameter.

Vacuum and Non-vacuum Trephine Punches (for donor) are available as a complete system, with blades ranging from 6mm - 9.5mm in diameter. This provides flexibility of use in instances where the Surgeon is not concerned about the vacuum when cutting the cornea from the donor. Non-Vacuum Trephine Punches are designed with four posts to ensure proper alignment between the punch base and the trephine blade holder, ensuring a perfect cut, every time.

The Radial Vacuum Trephine (for recipient) is a complete vacuum trephine system, with 16 vacuum chambers to provide stability for a clean and precise cut. The recipient trephines range from 6mm-9mm diameter in size and are supplied sterile and individually packaged.

To take advantage of the 10% introductory discount, call John Weiss & Son now on **01279 456256**, quoting offer code **TECFENQ120**. For more information on the Tecfen range, please visit https://jweiss.co/tecfen.
