

KeySIM launches £0.95 Narrowband IoT SIM on Vodafone and EE

Wednesday 19 November, 2025

KeySIM, a UK multi-network IoT SIM provider trusted by 500 UK businesses, NHS teams rescue organisations across the UK, has launched a new Narrowband IoT (NB-IoT) and LTE-M tariff priced at £0.95 per month with £0.005 per MB PAYG data rate.

The plan operates on Vodafone and EE and is designed for large-scale, low-bandwidth IoT deployments such as sensors, alarms, metering, environmental monitoring, tracking devices and industrial systems. A minimum of 100 SIMs applies.

Graham Robinson, Co-Founder of KeySIM, said:

“NB-IoT is taking off and customers want something simple, low-cost and contract-free. This new plan gives them exactly that — easy deployment, straightforward billing and the option for fixed IP or VPN when they need it.”

Simple, contract-free pricing for IoT projects

KeySIM's NB-IoT tariff uses a straightforward PAYG model, offering:

- No contracts
- Flat per-MB billing
- Full access to the KeySIM management portal
- UK private core breakout
- Optional private fixed IP and VPN services

Businesses can also request free test SIMs to evaluate coverage and platform features before deploying at scale.
