

Keystone clients have received a superb 20% return in 28 weeks

Monday 4 June, 2018

Investors have just received another substantial return following the successful exit of another private rental sector (PRS) investment through Keystone Property Group.

This week, Keystone Property Group clients are enjoying a 20%+ return after 28 weeks of investment from the Warrington development.

With planning approved last month, the all-important exit is now completed in full for Keystone investors. The Warrington site is being sold to one of the UK's largest institutional funders. This is another prime example of just one of many highly successful PRS development projects in the Keystone Property Group portfolio that have been carefully selected by the group's team of experts to provide healthy returns for their clients.

What is even more impressive is the fact that Keystone Property Group investors have enjoyed returns of 65%+ in the past 12 calendar months, an astonishing and superb achievement by any investment standards.

Keystone Property Group's Managing Director, Desmond Conway, said "We are truly delighted that our clients have received exceptional returns and it once again marks the culmination of months of hard work by all the team at Keystone"

Lastly, Keystone Property Group are very excited to announce that a brand new PRS development site has been identified which will result in another exceptional property investment opportunity becoming available soon.
