

KIIROO and Fleshlight are teaming up to make the best, even better.

Thursday 13 November, 2014

Fleshlight, the world's nr 1 male masturbator, is joining KIIROO to create the most realistic Cyberdildonic experience the world has ever felt. The KIIROO Onyx is the first fully interactive male masturbator, and with a patented Fleshlight sleeve inside, it's now more real than ever.

KIIROO, one of the leading pioneers in Cyberdildonics, have recently joined forces with Fleshlight, makers of the world's foremost male masturbators. KIIROO Onyx - a luxury male masturbator - will now feature materials from Fleshlight. Onyx is the most realistic, interactive male-oriented adult toy on the market.

While female toys currently retain the largest market share in the adult industry, Fleshlight is quickly gaining momentum. Men are now more open to the idea of using a masturbation aid, while KIIROO and Fleshlight are prepared to meet this new demand. Aside from new users, there are over 36,000 current users already on the Fleshlight Forums. These men are likely to be amenable to further sexual experiences online, which KIIROO can provide exclusively.

KIIROO is working with advanced technology including haptics and telepresence, whilst Fleshlight has international experience, superior materials, and an ever-growing fanbase. With this powerful combination of expertise and the partnership of two leading companies, a massive advance in the social lives of online users is anticipated.

The new KIIROO devices, which will be launched this winter, are only the beginning of the partnership between KIIROO and Fleshlight. The industry of Cyberdildonics is still in its infancy, and has plenty room for growth. With this in mind, KIIROO and Fleshlight are worth keeping an eye on.

"Our goal has never been to make the best male masturbator, or the best female vibrator. There are some amazing products already on the market, like Fleshlight. What KIIROO provides is the best experience when you're not physically together. We give you a way to touch someone over the internet. It's intimacy, it's sex in real-time, in a way that you've never seen it before. By joining forces with Fleshlight, we'll be able to make our product even more realistic, and available all over the world." said KIIROO CEO, Toon Timmermans.

"It is quite simple to see the interactivity wave our industry is riding. Consumers expect technology to allow them to interact with others in real time, this bleeds over into pleasure products as well. Kiirro's technology will now allow consumers not only to communicate in real time but to pass the sense of touch through pleasure products in real time. We are happy to be partnering with Kiirro with this new product launch, we expect it will be the beginning of the future of pleasure products," said Brian Shubin, Fleshlight COO.

ABOUT KIIROO

KIIROO was started in April 2013 as a Cyberdildonics company focused on connecting people in new ways. KIIROO is based in Amsterdam, the Netherlands, and is made up of a small team of new and established talent. The goal of KIIROO is to be the authority on Cyberdildonics and educate the world in online intimacy.

ABOUT INTERACTIVE LIFE FORMS

Interactive Life Forms was established in 1996 with the aim of providing men with a safe and healthy outlet for sexual expression. Over 9 million Fleshlight and Fleshjack® products have sold since their debut and their popular Flight model was voted the number one male sex toy of the year in 2013 by XBIZ, the adult industry's leading publisher of business news and information.
