

?KPIT Limited launches Complygate, the first ever Compliance Management Solution for Tier 2 Sponsors

Wednesday 18 April, 2018

A smart solution to efficiently manage the responsibilities of being a Tier 2 sponsor from a record keeping perspective.

ComplyGate (www.complygate.co.uk) a cloud based UK Compliance software, is a tool developed to support Tier 2 sponsors in meeting their immigration obligations to the UK&VI; by making record keeping and the maintaining documentation simple and easy.

The software aims to cover the requirements as listed in the Tier 2 Sponsor Guidance in order to effectively fulfil Sponsor duties and responsibilities. It comes with comprehensive features which we believe will revolutionise compliance management for companies who hold a Tier 2 sponsor license. Its tools and services can help ensure necessary controls are in place to prevent the sponsor license from being revoked, or any type of potential compliance breach in terms of record keeping.

Key features include a step by step workflow; an easy-to-use design interface; and a document management and automated flagging system which are secured using SSL certification within European Union location. It will be invaluable to not only entrepreneurs and small businesses alike but also to larger organisations, because of its potential to scale up seamlessly and integrate with their existing HR systems.

ComplyGate is a product of KPIT Limited, based out of Birmingham which provides bespoke IT solutions, IT Outsourcing, Web Development and CRM systems. The company is also using Artificial Intelligence in customising products to suit customer needs.
