PRESS RELEASE

For Immediate Release

Launch of New Digital Asset Hedge Fund - Cryptanium Fund I SP

A new digital asset hedge fund called Cryptanium Fund I SP has been launched. Cryptanium Fund I SP is a regulated Cayman Islands fund that encompasses best in class service providers, a core focus on governance, compliance and institutional investor due diligence requirements with a strategy focused on capital appreciation through deployment of trend-agnostic digital asset strategies seeking to capture yields and timed opportunities. The Fund will execute on-chain transactions and interact with decentralized finance protocols as well as digital asset derivative and hedging solution providers to achieve market neutrality. The fund is regulated by the Cayman Islands Monetary Authority (CIMA) and audited by a CIMA approved auditor under the umbrella of CV5 Digital SPC.

Eugene Moshnin, co-founder and CIO at Cryptanium: "*We are delighted to launch the Cryptanium Fund I SP. Given the increased scrutiny by investors we have launched a fund that is regulated and subject to the high standards of risk management expected of institutional investors. The fund's unique investment approach is to exploit market inefficiency through liquidity provision, market-making activities and arbitrage on chosen liquidity pools selected for their security, liquidity and yield return potential. A proprietary research system is used to assist in the discovery of outstanding opportunities by screening major DeFi protocols and blockchains.*"

David Lloyd, Managing Director of CV5 Capital, the regulated platform manager: "*We are delighted to assist and support the launch of Cryptanium Fund I SP. CV5 Digital SPC continues to be a leader in its field for digital asset fund managers seeking to launch and manage digital asset funds. We wish Cryptanium all the very best with the new launch*."
