Live Green launches, making sustainable living simpler for UK homes

Friday 17 October, 2025

Live Green officially announces the launch of its new website and sustainable living hub, bringing together expert-curated eco-friendly product recommendations, a comprehensive eBook and paperback, practical online training, and free resources to empower UK households to make greener choices, all in one accessible platform.

As part of the launch, everyone who subscribes to the Live Green mailing list will receive a free downloadable sustainability checklist for the home, making it easier to get started with practical, effective eco-improvements.

The "Sustainable Living Made Simple" eBook, normally priced at £6.99, is available for just £3.99 for a limited launch period, while Live Green's new comprehensive online course is also reduced by 30%, making expert guidance and step-by-step support even more accessible.

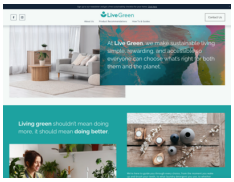

Live Green's launch delivers the UK's most practical eco-home advice, trusted product picks, and actionable tools for every household ready to embrace a smarter, healthier, more sustainable lifestyle. Additional courses and books will follow in the coming weeks.
