LM Concrete Garages Launches New Website

Friday 20 December, 2013

LM Concrete Garages announces a completely revamped website. After paying close attention to customer feedback, the company has redesigned its website to include much more imagery of product offerings, which customers have indicated they would like to see.

LM Concrete Garages has just launched its enhanced website, completely redesigned to provide more photos of top selling products like prefabricated garages and concrete sheds. Customers can view a wide range of product offerings in various categories such as battery garages, concrete garages, workshops, offices, sheds and garador garage doors. Each colourful tab, when selected, will show a photo of the item along with a brief description.

Current and potential customers looking for prefabricated garages, concrete sheds or other products can view a company brochure online. They can also obtain a no-obligation, online quote, conduct a free site survey and check out the company's current special offers. Customers who do not find the answers to their questions among any of the convenient tabs can complete the short "contact" form where they can type in their question to receive an emailed response. LM Concrete Garages is striving to make the company's website as helpful and user friendly for both current and future customers.

The exciting new site includes a number of customer testimonials as well as a section with answers to the most frequently asked questions. When choosing prefabricated garages, concrete sheds or other items, customers have a wide range of choices in fascias, door types, wall finishes, roof colors and windows. The staff of LM Concrete Garages can help custom design a garage, shed, workshop or other structure that will complement and enhance each customer's home or office.

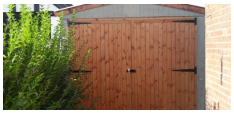

About the Company:
