Meet your IoT Ecosystem Partner at Wirepas GO

Friday 5 June, 2020

Wirepas, the leading technology provider for industrial grade wireless mesh, kicks off the third Wirepas GO ecosystem event on June 10th, 2020. Held as an online summit open for anyone interested in capturing success stories around IoT based digital transformation it will feature experienced practitioners from over 30 companies such as **Schaeffler**, **WeissBeerger**, **Prologis**, **AWS**, and **Dell**. They will share how they are using Wirepas Mesh to impact their current and future business. Companies such as **Signify** (formerly Philips Lighting) and **IoT Analytics** are presenting global market trends in keynote speeches.

Wirepas invites those involved in the planning, design and operations of IoT solutions at scale to register and join this free online event. Five parallel sessions will be offered, each highlighting important aspects of successful digital transformation journeys. Industry leading panelists and interesting presentations accompany each track.

Real world use cases will be covered in the tracks around Smart Lighting, Smart Asset Management and Smart Spaces. For developers and engineers, a technical track provides a deep insight into Wirepas mesh. Executives and project managers will learn about how to build valuable partnerships with our 150+ partner companies by attending the Wirepas ecosystem track.

The nearly 40 presentations will discuss IoT mesh solutions in real-world cases like:

- Increasing safety of construction workers
- Minimizing infrastructure needs in smart buildings
- Reducing downtime in industrial pumps by using intelligent monitoring
- Improving hospital workers care quality by tracking assets in a hospital
- Securing the availability of the next beer by monitoring the beer flow in the pub

Wirepas GO 2020 is an interactive digital event. Attendees are invited to ask questions of the presenters and panelists during their talks. A built-in matchmaking tool provides all attendees the ability to book one-on-one discussions with any of the speakers or participants during the event and the next day to foster building a stronger IoT ecosystem.

At Wirepas we are excited to hear what companies are doing with our Wireless Mesh Networking technology and introduce them to great new partners. Join the over 500 pre-registered IoT enthusiasts to learn more. **Register for Wirepas GO at:** http://info.wirepas.com/wirepas-go-online

About Wirepas

Wirepas is an international technology company focused on IoT mesh connectivity software. Our solutions enable millions of IoT devices to be meshed together for low power, infrastructure free communication. With a focus on industrial and enterprise

markets, Wirepas delivers reliable, scalable, cost effective wireless IoT solutions to empower our customers to create digital transformation.
