Millers UK Provides Lone Worker Solutions With A Fujitsu Air Conditioning Upgrade

Monday 24 June, 2019

Millers UK recently carried out a commercial air conditioning system installation in Rochdale at Lone Worker Solutions Ltd.

Lone Worker Solutions is an award-winning locate-and-respond protection system for people who work alone or out of sight of colleagues. It offers a comprehensive package of features including emergency, buddy, reactive, proactive, broadcast and virtual barrier protection for all lone working scenarios.

Safe Hub supports the broadest possible array of devices including Android, Apple and Windows smartphones, BlackBerry, standard mobiles, PCs, intrinsically safe devices, specialist lone working safety devices and satellite phones.

Lone Worker Solutions, a Rochdale company, needed a modern commercial air conditioning system and sought the help of Millers UK. To ensure that their employees have a comfortable working environment, a high-quality Fujitsu air conditioning system was advised. In most commercial offices you will find that computers and appliances dry out the air.

About Millers UK

At Millers UK our team provides installation solutions for standalone commercial air conditioning systems and commercial laundry equipment. This can include modifications of modern air conditioning systems that are already installed on site. All of the commercial air conditioning installations are carried out within the North West of the UK. This includes Lancashire, Cumbria, Manchester and Liverpool.

The air condition units that Millers UK installs are suited to corporate offices, computer server rooms, restaurants and fitness centres. This can include modern systems and existing modifications to your ventilation system.

Given the fact that Millers UK has been in business for over 28 years, we have developed a close relationship with popular commercial air conditioning manufacturers.

Some of which include Fujitsu, Sanyo, Carrier, Mitsubishi, LG, and Hitachi.

> **“For the customer to receive the most efficient system, we combine the best quality products and the best service, so that our customers get the best of both worlds”. Scott Miller - Managing Director of Millers UK**

Fujitsu Multi Split Systems (Air Conditioner)

Space-saving installation

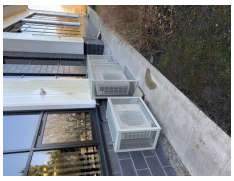

Multiple indoor units can be connected to 1 outdoor unit, and the long piping connection is also possible. Compared with a single type, the outdoor unit can be installed in various places to realise the space-saving installation.

Wide range of indoor units with various models

Eight types of 28 models are lined up in the capacity range from 2kW to 7kW class. Wide range of needs can be met from rooms of private homes to large shops and hotels.
