

Moniat and other Cryptocurrencies are the Future of Money

Monday 17 December, 2018

History has taught us that it is often the case with any new disruptive innovation, from satellites to the Internet, from social media to digital clouds, that they are heavily disparaged before becoming mainstream. That assures the same will happen with cryptocurrencies.

Moniat is a cryptocurrency (digital asset) designed as Utility ERC20 Token to work as a medium of payment in future decentralized applications and services utilizing the blockchain in the introduction of new dApps.

Moniat uses strong cryptography to secure financial transactions, control or rather eliminate the creation of additional units, and verify the transfer of assets. Moniat, or MAT, is an ERC20 with smart contracts based on the Ethereum blockchain, which defines a common list of rules to follow within the larger Ethereum ecosystem.

Moniat uses decentralized control as opposed to centralized digital currency and central banking systems. The decentralized control of each cryptocurrency works through distributed ledger technology, typically a blockchain.

Moniat is the cryptocurrency or crypto token that changes the philosophy of trading and generation of profit. Holders of Moniat have an amazing option to link their MAT Dashboard Accounts to other investors' accounts and get accumulated 10% MAT profit up to 5 levels down in a [Link Trading Concept], which runs securely on an automated decentralized blockchain.
