

Munters Awarded “Advanced Energy-conservation Product 2016” by its Innovative Oasis™ DCiE Data Centre Cooling Technology

Monday 19 December, 2016

On Nov. 16th, Munters Oasis™ DCiE product was awarded "Advanced Energy-conservation Product 2016" with its innovativeness and energy-saving performance by China Electronic Energy-saving Technology Association (hereinafter, CEESTA). The award recognized the mainstream energy-conservation technology and the future direction in Data Center industry.

As the largest event in China Data Center energy-saving industry, China Data Center Energy-conservation Technical Conference hosted by CEESTA was grandly held in Hotel Nikko New Century Beijing on Nov 16th. Nearly 1,000 guests including government leaders and industry experts were invited to attend the conference. Except for the awards ceremony, the conference also provided a great opportunity to discuss the development trend of China Data Center infrastructure industry and market from the perspective of energy conservation.

CEESTA was founded in 1986. Supervised and administrated by China's Ministry of Industry and Information Technology and China's Ministry of Civil Affairs, CEESTA is a professional organization to carry out technical activities related to energy saving, environmental protection and comprehensive utilization of resources nationwide.

Alex Lv, Data Center Sales Manager (China Region), collected the award together with the award winners from other companies.

- Energy efficient data centre cooling
- Suitable for Multi-storey installations
- Ideal for tropical climates

About Munters: Munters is a global provider of energy efficient air treatment and the leading international provider of evaporative air cooling, temperature and humidity control solutions. When it comes to Data Centres. Munters currently cool over 190MW of rejected heat while achieving low partial PUE results, CO2 emissions & high energy savings.
