Netstar IT Support London have successfully renewed their Cyber Essentials certification – showing security is always top of mind

Wednesday 22 April, 2020

Cyber Essentials demonstrates that an organisation has met the compliance standards for the government-led scheme in cyber security.

London, 22nd April 2020 – Last week Netstar completed their annual renewal of their Cyber Essentials certification.

To obtain this important certification, organisations are assessed against five basic security controls. The controls explain how to:

- Secure your internet connection
- Secure your devices and software
- Control access to your data and services
- Protect from viruses and other malware
- Keep your devices and software up to date

Malcolm Diack, Senior Strategist at Netstar led the renewal process, and he emphasised how following these standards enables Netstar to live its mission of 'Helping People Succeed Through Technology'.

By investing in Cyber Essentials, Netstar shows their commitment to staying secure as well as to keeping their clients as secure as possible.

It is also valuable for Netstar's clients when it comes to meeting their own security regulations.

Holding the Cyber Essentials certification can help organisations avoid costly mistakes related to data breach. It can also help meet other, quality related regulatory needs.
