Netstar IT Support London wins Best Enterprise MSP Project for IT Security at the Managed Services and Hosting Awards 2019

Monday 23 September, 2019

London, 23rd September 2019 – Netstar IT Support, recently named as one of the UK's Top 10 IT Security Providers for 2019 won the category of Best Enterprise MSP Project last night at the Managed Services and Hosting Awards 2019.

The criteria for the best project was based on demonstrating significant benefits to the client's organisation. The winning project covered consultative work carried out by the Netstar IT Support team to assist a client in the professional services industry.

Lasting several months, the project focussed on assisting the client obtain their ISO 27001 Information Security Management certification. In order to achieve this many different standards and services were put in place, completely upgrading their IT security set up.

Malcolm Diack, Senior Strategist at Netstar IT Support says:

"The process was very involved, and we worked with the client from start to finish to ensure they had the systems in place to obtain this rigorous certification. The benefits have been twofold, not only have they improved their own security systems, but it has given their clients greater assurance of data security and allowed them to take on new contracts."

The MSH Summit is the UK and Europe's foremost event focused on the managed services and hosting market. The MSH Awards provide the industry with a platform to celebrate success.

Mit Patel, Managing Director, Netstar IT Support adds,

"We are delighted to have won this award. As an organisation we continually invest in R&D for the benefit of our clients and work tirelessly to refine our processes and systems. This ISO 27001 IT Security project is just one example of how we strive to make technology a platform for business growth for our clients. This project was a chance to go a step further to helping our clients feel secure and it was a big step forwards for the business in achieving our mission of Helping People Succeed Through Technology."
