

# New Battery-Powered Digital Signage to Replace Outdoor Sandwich Boards

Monday 9 September, 2019

## Dual-Sided Digital A-Frame Engages Customers in Shop-Front Locations

Armagard announces the launch of its battery-powered DigiStopper. This unique range of cable-free, outdoor digital A-frames replaces the traditional sandwich board with portable, high-bright and weatherproof advertising ideal for shop-front locations and customer entrances.

"Businesses benefit from engaging outdoor advertising that makes a great first impression on passers-by and helps them stand out on the high street," says Mark Neal, MD of Armagard.

The [portable outdoor A-frame](#) has two 43" displays, lockable castor wheels and an IP56 rating that allows vendors to advertise effectively in any weather.

"Importantly, the dual-sided design captures the attention of people walking in both directions, so vendors enjoy twice the customer engagement from a single digital signage unit," says Mark Neal.

Battery-powered units are available with displays of 700 NITS and 1,000 NITS, offering run times of up to 14 hours from an overnight charge. For maximum visibility in direct sunlight, a 2,500 NITS, mains-powered option ensures promotions stay clear in the brightest conditions.

"We wanted to provide businesses with a user-friendly and engaging solution to pavement digital signage," says Mark Neal. "Cordless operation makes it easy for users to position the A-frame each morning and move it around during the day, ensuring promotions get seen by the greatest number of people."

As an outdoor-ready solution, the [IP56 digital A-board](#) has an innovative environmental controller board that ensures reliable advertising up to 40°C. The sunlight readable screens also feature automatic brightness controls that keep promotions clear and engaging throughout the day.

The first production batch has already been ordered. Armagard's Germany-based partner, an existing user of DigiStopper units, says: "We're excited to be the first company to partner with Armagard to bring these unique displays to businesses looking for convenient and effective shop-front advertising."

Armagard welcomes enquiries from resellers and end users interested in purchase or lease options. For more information on the full range of DigiStopper units, visit [www.armagard.co.uk](http://www.armagard.co.uk) or call +44 (0)121 608 7210.
