New Big Growing-Facility Will Be Opened in March 2021

Monday 1 March, 2021

In March 2021, Marry Jane is opening a new indoor facility with an area of 10 000 square meters which makes it the largest indoor CBD growing facility in Europe. This size will allow to plant and grow up to 15 tons of harvest per annum.

The facility will be equipped with a climate control system. A high level of automation alongside the modern methods and large area will let the customers get the best quality of every single plant harvested inside.

Marry Jane wants their customers to be perfectly satisfied with the products and choose the brand over and over again. “Main advantage of the new facility will be its capacity. We will be able to harvest continuously every week at least 250 kg. We will work with a closed system and will be able to provide the same quality of flowers during the whole year. Everything will be controlled by the climate control system”. — says Mischa Gribi, CEO Marry Jane.

About Marry Jane

Marry Jane grows Cannabis Sativa L. plants with high CBD content and uses them to make premium quality products like CBD drops, e-liquids, CBD Vape, and others.

The uniqueness of the products lies in the way of growing the plants. They are pampered to give out the best that can be offered by the natural properties of the Cannabis Sativa L. No pesticides or herbicides are used during the whole process.

Powered by a pioneering spirit, Marry Jane is striving to improve and increase the CBD industry as well as provide premium cannabis products for people around the world. The company intends to continually increase quality throughout the manufacturing process.

Marry Jane claims to bring the best products accessible to everyone and be more than just a supplier of fine cannabis products to its customers. The company sees its role as being a contributor to the celebration of this culture.
