

New Biz Express expands its business start-up packages

Wednesday 5 December, 2012

We have been working tirelessly to launch our new business start-up packages. Designed with the sole intention of making new business creation easier, we're here with more than your average start-up advice and off-shelf solutions.

New Biz Express fills a large gap in the market for small business owners who want to start a business but don't have a large budget- but still want quality.

Responding to the demands of Startups' users, New Biz Express launches its new start-up packages with great excitement. The packages include a professionally designed websites, bespoke logo design, stationery pack, bespoke video, a professional press release for when the business is launched and much more. They can be viewed at: <http://www.newbizexpress.co.uk/business-packages>.

We're very proud of the new packages and believe they will have great appeal to the start-up market.

The packages are the latest offering from New Biz Express and follow the successful launch of our first business start-up package, which was created as an affordable alternative to purchasing each service individually, at a potential cost of thousands.

Applying the same approach, New Biz Express promises professional expertise together with a friendly and personal service. We are not here to just sell you a package; we are here to make sure you succeed in business.

There are three packages starting at just £399.00 and customers can have their new business up and running in a matter of weeks. In a bid to take the hassle and time out of starting a business, New Biz Express, promises to go from purchasing a package to launching a new business in a matter of weeks.

Additionally, our clients are not charged additional monthly fees for hosting or maintenance of their website once they purchase our package.

Russell Conneely, director of New Biz Express said: "These two new packages are a natural extension to our first start-up package, and offer even more exciting services to make your new business a success. It is a shock at how many people thinking of starting a business are put off because they are quoted silly prices for things such as a website or logo design, or they just don't know where to begin. Now with our packages they don't have to worry and can have a complete business set-up and trading within weeks."
