Thursday 27 February, 2025

[Delphos, OH February 27, 2025] – Every successful product starts with an idea—but turning that idea into a scalable, profitable business is where many innovators struggle. In *From PATENT to PROFITS: Capitalizing on Your Invention*, serial entrepreneur and inventor Michael Crites offers a step-by-step playbook for transforming groundbreaking ideas into thriving enterprises.

Leveraging his experience in building a multi-million-dollar company from a simple yet innovative concept, Crites provides business leaders, startup founders, and product developers with practical strategies to navigate patents, product development, funding, and commercialization.

A Practical Guide for Business-Minded Innovators

Designed for professionals seeking scalable growth, this book walks readers through critical steps, including:

- ? Market Validation – Assess demand and viability before investing time and capital
- ? Product Development – Build and refine prototypes with strategic iteration
- ? IP Protection – Secure patents and safeguard competitive advantages
- ? Business Structuring – Establish a foundation for long-term scalability
- ? Capital Raising – Attract investors and leverage funding opportunities
- ? Profit Maximization – Develop a sustainable revenue model
- ? Exit Strategy – Plan for acquisitions, licensing deals, or business succession

“With *From PATENT to PROFITS*, I want to bridge the gap between innovation and execution,” says Crites. “Too many brilliant ideas die on the vine because inventors lack the business acumen to commercialize them. This book is about turning inspiration into impact—and revenue.”
