

OSD supplies Principality of Andorra with EU Standard Driving Licence and Advanced Personalisation System

Wednesday 3 June, 2026

Andorra/Vienna – The Austrian State Printing Company (OSD) is proud to supply the Principality of Andorra with a new EU-standardized driving licence card and a fully integrated state-of-the-art personalisation platform by OSD. The solution, delivered to the Andorran Departament de Seguretat Industrial i Vehicles (Ministeri de Presidència, Economia, Treball i Habitatge), went live in the **end of 2025** and sets a new benchmark for security, usability and European compliance.

A Fully Integrated Personalisation Solution

OSD supplied a modern and efficient personalisation solution – from **data-quality check** and secure processing to **on-card personalisation**. “Our customer now benefits from a fully automated, highly secure issuance workflow that includes the efficient personalisation, quality check and delivery of a card that meets, and exceeds, European Union standards,” says Jorge Carvalho, Head of International Sales at OSD.

The collaboration with the Departament de Seguretat Industrial i Vehicles illustrates how OSD’s expertise in secure document production is used to supply **tailor-made** solutions to its customer, offering a modern, **fraud-resistant** travel document of the latest standard.

Key Security Features of the new Andorra Driving Licence

- **Digitally Signed Barcode** – Stores the holder’s ID information and can be read offline, guaranteeing the documents integrity and rapid digital verification at any checkpoint **even without** an internet connection.
- **Transparent Window with Special Design** – A visually striking, tamper-proof element that increases the protection against manipulation and counterfeiting.
- **Multiple Laser Image (MLI)** – A **high-resolution laser-engraved** image that adds an additional layer of protection and visual authenticity.

All features comply with the latest **EU standards** for driving licences and are integrated into OSD’s proven personalisation solution “PIA – Personalisation in Action”.

OSD as Trusted Supplier of Personalisation Systems

The successful delivery to the Principality of Andorra underlines OSD’s role as a trusted provider of secure personalisation technologies for identity and travel documents. By delivering a turnkey solution that combines **cutting-edge** security, robust data protection and **high efficiency**, OSD proves its experience to modernise national ID programmes while safeguarding personal security and privacy requirements.
