# PagePeek Launches AI System to Support Academic Essay Evaluation Beyond Proofreading

**Wednesday 17 December, 2025**

Students searching online for *“grade my essay”* are often looking for more than basic grammar checks. They want to understand whether their academic work meets real assessment standards — including structure, argument quality, and the appropriate use of evidence.

**PagePeek**, an AI-powered academic evaluation platform, has launched a new system designed to support this need by going beyond traditional **academic proofreading**. Rather than focusing solely on surface-level language corrections, the platform evaluates essays using criteria similar to those applied by university markers.

## Academic Evaluation Requires More Than Proofreading

As academic expectations continue to rise, many students struggle to assess their own work objectively. While conventional tools focus on spelling and grammar, academic grading typically involves deeper considerations such as:

- Strength and coherence of arguments
- Logical structure and academic organisation
- Quality, relevance, and credibility of sources
- Accuracy and consistency in referencing

PagePeek addresses this gap by treating essay evaluation as a process of academic judgment, rather than a simple language check.

## What Students Mean When They Search “Grade My Essay”

When students search for *grade my essay*, they are often asking whether their work aligns with expectations at a specific academic level — undergraduate, postgraduate, or research-oriented.

PagePeek evaluates essays across these levels by analysing structure, reasoning, academic tone, and citation practices. This helps students identify weaknesses that may affect their final grade before formal submission.

## Supporting Meaningful Revision, Not Just Rewriting

Many students also search for *“rewrite my essay”* in an attempt to improve clarity or grades. However, rewriting without understanding academic weaknesses can lead to superficial changes.

PagePeek supports targeted revision by highlighting:

- Weak or unsupported arguments
- Underdeveloped academic sections
- Structural issues that limit clarity or depth

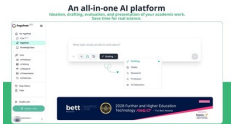

This approach ensures that when students revise their work, improvements are academically meaningful rather than cosmetic.

## Academic Proofreading vs Academic Evaluation

Academic proofreading focuses on correctness.

Academic evaluation focuses on quality, rigour, and alignment with assessment criteria.

PagePeek complements proofreading by extending the process to include rubric-based evaluation, structured feedback, and transparent scoring logic — reflecting how academic work is actually reviewed.

## About PagePeek

**PagePeek** is an AI-powered academic evaluation platform designed to support structured thinking, clearer writing, and responsible academic revision. By combining academic proofreading with in-depth evaluation and feedback, PagePeek helps users understand how their work is assessed — and how to improve it before submission.
