

Parkopedia partners with INDIGO Group's OPnGO to strengthen parking reservation and payment services in Europe

Thursday 11 November, 2021

- OPnGO's services will be integrated into Parkopedia's consumer applications as well as in-car solutions for automakers, enabling drivers to make parking reservations and payments via the vehicle's infotainment screen
- OPnGO provides digital frontend services for the INDIGO Group, one of Europe's largest parking operators
- Service launched for 220 car parks in France, Spain and Belgium, before being rolled out across the entire INDIGO network

11 November 2021 - London, UK / Puteaux, France

Parkopedia, the market leader in connected vehicle services, is now working with OPnGO, the digital subsidiary of INDIGO Group, one of Europe's largest parking operators, and a world leader in parking and individual mobility services, to provide seamless in-car parking reservation and payment services across France, Spain and Belgium.

OPnGO is a universal digital parking service that aims to transform the driver experience in urban areas by aggregating a complete off-street parking offer. With a location-based service that automatically detects parking areas, OPnGO allows drivers to find parking spaces, compare prices, prepay and obtain unique discounts.

With number plate recognition technology, drivers will be able to seamlessly enter and exit car parks without requiring a ticket or needing to stop at a pay station. Drivers will also no longer need to worry about additional stay costs, as the solution allows digital payments for the total time of the stay, without requiring any further action from the driver.

Parkopedia has integrated OPnGO parking reservations in its consumer apps and in-car solutions for 220 car parks in France, Spain and Belgium, with services to be rolled out across the entire INDIGO portfolio shortly.

Pascale Bonnard, MD of OPnGO, said: "This partnership with Parkopedia will allow numerous drivers to benefit from our license plate recognition technology. They will have an easier and seamless parking experience while having access to all our parking services through in-car display, which guarantees a safer and easier experience."

Hans Puvogel, COO of Parkopedia, said: "We are delighted to partner with leading service provider OPnGO of The INDIGO Group, together, we push forward the possibilities of individual mobility services, enabling automakers to deliver seamless user experiences and high value services to drivers in France, Spain and Belgium."

Parkopedia strives to constantly expand its reach of products and services, through partnerships with services providers such as OPnGO, as well as working with the majority of automakers globally. To continue these developments, and in recognition of France's position as the second largest car industry in Europe, Parkopedia has launched a dedicated French B2B website, to support existing, and future, clients and partners based in French speaking countries, by providing the latest news and product updates. The new website can be found at: business.parkopedia.com/fr.
