

Peak-Ryzex and Loqus Group Fleet form Strategic Alliance

Monday 22 May, 2017

Chippenham, Wiltshire - 18th May 2017 - Peak-Ryzex has cemented its relationship with route optimisation software developer, Loqus Group Fleet. The new formal alliance will enable fleet & field-service organisations to gain benefits from the combined expertise of both organisations. Our joint software, hardware & service propositions will reduce operational costs, improve response times, improve customer service levels, increase efficiency and promote a healthier bottom line.

Peak-Ryzex acknowledges a growing demand for a combination of fleet route optimisation, dynamic job scheduling and vehicle tracking combined with end customer's demand for flexibility in service delivery options.

The portfolio of joint Peak-Ryzex and Loqus Fleet solutions, therefore, provide organisations with a winning combination of mobile device hardware, mobile device management, 24 x7 customer support, M-Netics iM2 mobile software and the unrivalled OpenFleet route optimisation platform route optimisation solutions which allows customers to efficiently plan and manage their vehicle fleets and field-service operations.

"Loqus Fleet have developed the OpenFleet platform, a suite of fleet management & route optimisation software solutions, which integrate with the M-Netics iM2 software platform. They have an ethos of providing value to their clients, delivering rapid return on investments, combined with an excellent pedigree across a number of sectors including postal & courier, transport & logistics, field service & construction" says John Coon, Peak-Ryzex MD. "By partnering with Loqus Fleet, we are able to deliver a comprehensive solution that will make it possible for organisations to streamline their fleet logistics or field services, drive efficiencies and gain more insight into operations and service levels, their monthly, weekly, or even hourly service levels which is particularly important in today's exceptionally competitive landscape where organisations are looking for ways to differentiate their offering".

Roland Scerri, Deputy Group CEO of Loqus adds, *"Our partnership with Peak-Ryzex allows us to provide a 'hand to hub to hand' solution for our clients. Peak-Ryzex have extensive knowledge of enterprise mobility and I see great advantage for customers requiring a fully managed mobile solution. I am particularly excited by this as I really believe this alliance will produce a complete end to end logistics proposition whilst unlocking resources & driving fleet management efficiencies".*

Peak-Ryzex, together with its software division M-Netics, have a long history of supporting their 'enterprise mobility' clients, including mobile devices, iM2 software suite, printing & wireless technology to increase employee productivity, organisational efficiency and profitability. Through its business, Loqus helps its clients derive impressive financial and operational savings from their fleet & field service operations.
