Power anywhere any time without ELECTRICITY and with the help of waste plastic bottles

Friday 14 July, 2017

Global recycling expert Angus Carnie has now developed an emergency power source which creates electricity with the help of waste plastic bottles!!

With billions of discarded waste plastic bottles polluting our planet this really is a fantastic idea not only as a solution for this waste stream but could also save lives in the event of a disaster!

Carnie of course famously built a house from MacDonalds restaurants waste packaging and is rumored to be building a motor vehicle completely from waste!!

The Eco visionary is striving to be completely self sufficient and already has no utility bills!!
Carnie suffered a grand mal brain seizure in 2014 and this has created a constant focus on how you would cope if faced with a serious life changing event!!

This truly inspirational man never accepts defeat his can do attitude is amazing companies queue up for his services on how to become more environmentally friendly and his knowledge of the waste/recycling industry is unparalleled All despite facing major inter cranial brain surgery.
