PPRX strengthens access to Mounjaro and Wegovy across the UK as demand for weight-loss injections surges in 2026

Wednesday 4 February, 2026

London, United Kingdom – February 2026

PPRX, a fully registered UK pharmacy, has confirmed expanded nationwide access to prescription weight-loss injections Mounjaro and Wegovy, responding to unprecedented demand from patients seeking clinically supported weight management outside of the NHS.

As NHS access to GLP-1 weight-loss treatments remains limited due to strict eligibility criteria and long waiting lists, increasing numbers of patients are turning to regulated private pharmacies for faster, medically supervised care. PPRX offers a fully compliant alternative, providing access to both Mounjaro (tirzepatide) and Wegovy (semaglutide) through a secure online consultation process, with next-day cold-chain delivery across the UK and Northern Ireland.

Mounjaro and Wegovy are prescription-only injectable treatments that work by regulating appetite and improving metabolic control. Clinical studies have shown both treatments to be effective for long-term weight management when prescribed and monitored appropriately.

PPRX operates as a legitimate UK pharmacy and is registered with the General Pharmaceutical Council (GPhC). Patients and partners can independently verify the pharmacy's registration on the official GPhC register:
https://www.pharmacyregulation.org/registers/pharmacy/9012740

GPhC registration number: 9012740

"Our priority is patient safety, transparency, and proper medical oversight," said a spokesperson for PPRX. "We are seeing strong demand from patients who are informed, motivated, and seeking responsible access to treatment. Every prescription is issued following a clinical assessment by a UK-registered prescriber, with ongoing pharmacist support."

Through its digital consultation pathway, PPRX enables patients to access treatment without the need for a GP appointment, while still maintaining full regulatory compliance. Each order includes a genuine manufacturer pen, needles, swabs, sharps disposal, pharmacist guidance, and temperature-controlled next-day delivery.

PPRX provides detailed educational resources to ensure patients understand their treatment, including safety information, dosing guidance, and injection support.

Industry analysts note that private pharmacies are increasingly filling a gap created by rising obesity rates and constrained NHS capacity. Regulated providers such as PPRX play a key role by offering controlled access, patient education, and pharmacovigilance within a compliant framework.

PPRX has confirmed continued investment in pharmacist-led support, supply-chain resilience, and patient education as part of its 2026 expansion strategy.

About PPRX

PPRX is a UK-registered online pharmacy providing prescription medicines through regulated digital consultations. The pharmacy operates under the standards of the General Pharmaceutical Council and supplies treatment nationwide with a focus on safety, transparency, and patient care.
