Press Release: Bits Digit announced its ICO (BITD) crowdsale launch for the beta platform includes e-wallets, professional exchange, ICO market, POS and merchant platform services, brings cryptocurrency to all.

Sunday 16 July, 2017

July 16th, 2017, Belize/Singapore – Bits Digit 'A SME Economy on Blockchain' (BITSD) has announced the beta release date (Sep 1st 2017) of its cryptocurrency services. The cryptocurrency solutions platform brings together a dedicated wallet service, exchange, and a merchant platform upon which cryptocurrency enthusiasts and investors can interact, trade currencies and ideas, Start crowdfunding.

The Bits Digit project is developed by an international team. The Bits Digit initiative was first presented by Kumar in early 2017, and it's due to the continued support and belief of the other team members that such a massive project was able to come to fruition.

In Jun 2017, the platform published its whitepaper on Bits Digit, outlining the technical specifications of the platform. Bits Digit developers, learning from the past errors of Bitcoin developers have focused on the security of the platform, implementing the more consolidated, cryptocurrency-agnostic platform for the benefit of crypto-community and others.

The main purpose of Bits Digit is to create a single, user-friendly ecosystem suitable for mass adoption among non-technical users, or individuals new to the Industry. The platform enables a system that combines cryptocurrency and fiat services, made available to customers over a single registered account within the platform.

The Founder of Bits Digit Kumar sharing thoughts about the platform's focus said,

"A single platform for all the financial need was not easy to create but with the support of our tech partners it possible now, and we truly believe that Bits Digit can make it a lot simpler for any average person out there to enter the world of cryptocurrencies and blockchain-related products and services."

The beta soft launch version of Bits Digit platform is 90% completed and has enabled its exchange feature with fully operational payment gateway (POS) system. Interested users can test the exchange, merchant list and point-of-sale to get a feel of Bits Digit platform on 1st Sep 2017. The cryptocurrency platform's other main features, including a crowdfunding tool, an ICO platform, third-party plugins, market cap and coin overviews, a blockchain forum, remittance and payment gateway are all just around the corner awaiting implementation.

The native currency of the Bits Digit platform, BITSD is implemented as an Ethereum smart contract, which governs the validation, distribution, value and the ownership of the tokens. Apart from BITSD, the platform will support most widely-used cryptocurrencies, enabling customers to convert them into fiat via the Bits Digit exchange service. A lot more features will be added to the platform during the next phase of development.

Like: Crowdfunding, P2P Funding, Healthcare market escrow, insurance/Project voting, multisingnature address safety, multisignature wallets, commodities, biometrics, SME Funding etc.
