Pro UK Consultants: 3 Ways Entrepreneurs Think Differently

Monday 10 February, 2014

Jameel Paul, managing director at Pro UK Consultants, voices his commitment to mentoring aspiring entrepreneurs and outlines three ways successful people think differently, which leads to building a lucrative business.

Pro UK Consultants is an outsourced sales and event marketing firm based in Birmingham's city centre. Entrepreneur Jameel Paul, who is also the managing director at Pro UK Consultants is devoted to coaching and training aspiring entrepreneurs across the West Midlands.

In an article by Rebekah Iliff published on entrepreneurcom, she states, "Entrepreneurs are barrier breakers whose optimistic view of the world combined with their creative thinking has the ability to address even the toughest of challenges, including the government's approach to innovation." Jameel Paul, supports the expansive research which proves entrepreneurs think differently. It is usually their tremendous work ethic and an 'anything is possible.' mentality that enables entrepreneurs to go further, and create a business that is profitable. Jameel Paul of Pro UK Consultants reviews three qualities of entrepreneurs:

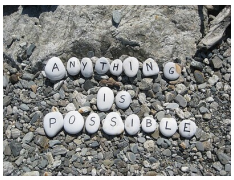

1. Entrepreneurs are optimistic
Although it may seem the most obvious quality of an entrepreneur, Jameel Paul stresses the importance of optimism. Approaching the world in a positive manner, and having a secure mind-set on future successes is essential. Of course having plenty of knowledge, skill and expertise is mandatory, but without an optimistic execution plan, Jameel Paul claims these skills are nowhere near as valuable.

2. Entrepreneurs are rule breakers
Natural entrepreneurs are those who break the rules and are not afraid of going the extra mile to achieve success. Jameel Paul claims that being an entrepreneur enables him to construct his own life and achievements, rather than being restricted to another person's standards or ideas. With this mentality in mind, entrepreneurs will also over-step the boundaries to ensure they get the most out of their business.

3. Entrepreneurs are tech savvy
Technology today enables entrepreneurs to be more innovative. Jameel Paul at Pro UK Consultants therefore emphasizes the importance of being reliant on technology and the many benefits it brings to a business. Technology is efficient, delivers accurate results and maximizes workforce productivity. By allowing technology to take care of these fundamentals, it allows entrepreneurs to put their focus and attention into other areas of the business.

Pro UK Consultants is an outsourced sales and event marketing firm in Birmingham. The firm offer direct marketing campaigns that engage with their clients' customers directly. Pro UK Consultants offer services that increase brand awareness, customer acquisition and lead generation at a competitive cost.
