

Pyxis Edge and Capgemini UK announce innovation collaboration

Wednesday 27 March, 2019

Pyxis Edge, a new style hybrid accelerator, is pleased to announce that it will be working with Capgemini, a global leader in consulting, technology services and digital transformation, as an approved delivery partner to Pyxis Edge to develop solutions for its carefully selected innovations.

Pyxis Edge truly believes that bringing together world class delivery partners, such as Capgemini, with exciting, innovative start-ups, and exclusive investors can improve the chances of great ideas being successful when they reach market. The joint process instils technical governance, expert development and exceptional creativity, complementing Pyxis Edge's approach of ensuring investors' money is held in escrow, only releasing funds when an agreed schedule of work has been achieved.

With Pyxis Edge, investors can trust that their investment is being used solely to bring a minimal viable product to market, which is delivered by technology and creative companies at the forefront of innovation.

Pyxis Edge only collaborates with the most astute investors, the world's best delivery partners and passionate, creative entrepreneurs. For more information, please see our website (<https://www.pyxisedge.io>)
