

Real Land (RLD IPO Token) announced worlds first ICO, IPO World's First Token with 100% Offer Price Guarantee!

Monday 4 December, 2017

THAILAND, December 2, 2017 - Real Land, the company behind the RLD token, a unique blockchain-secured digital asset that exhibits inherent value as a secure cryptocurrency and allows users to participate in Real Estate Units is pleased to announce its recent agreements with some of the best Real Estate investment groups in Asia. The aforementioned agreements pertain to Token Investments in Real Estate Units.

What makes the Real Land ICO or IPO stand out is that Real Land is giving an offer-price guarantee to all RLD investors, meaning that even if the value of the RLD Token dips to zero, Real Land will provide compensation, providing investors with the amount of RLD's original, \$1 value back to each and every one of them.

The RLD IPO or ICO Units can be contributed through Ethereum (ETH), Bitcoin (BTC) and through many other options.

Real Land Co-Founder, Ms. Ana, clarifies that "The motivation behind the RLD IPO was to create a secure way to take advantage of the crypto-revolution, as well as Real Estate tangibility and growth, which was really missing from the crypto market. What's more, the RLD IPO aims to give the opportunity to small, global investors to participate in the Global Real Estate Market, and benefit from a better yield on their investments. In other words, we have created and opened a gate of global Real Estate Units, accessible by all potential investors, that is free by the constraints imposed by geographical borders and government regulations. Furthermore, Real Land's objective is to offer a solid IPO platform, where every Real Estate Unit can be tradeable. With the RLD Token, every Token holder can convert her RLD Tokens into any of the Real Estate Units we have contracted, at any given time. Thus, if any investor wishes to live in a beach house in Pattaya, all she needs to do is send us the amount of RLD Tokens that is equivalent to the value of her Unit of choice, and gain the unit's ownership. Nevertheless, even if investors don't wish to convert RLD Tokens into Real Estate Units, they can still benefit from a 15% yield, annually, in the form of an ETH bonus."

Real Land IPO Specifications

80% of Real Land IPO or ICO assets will be utilized for the purchase of Real Estate Units in different locations throughout Asia, such as Thailand, Indonesia, Cambodia, and India, among others. 10% of the aforementioned assets will be utilized for the creation of an IPO platform, which will host future IPO's. An additional 5% will be used for marketing expenses, and 5% will be managed by the Real Land team, for other expenses that might be incurred in the process.

Ms. Alexandra, Real Land Co-Founder, stated that, "RLD is different from any other similar ICOs, which are known to offer resource-sponsored Tokens, without any sort of value protection. The RLD plan will protect investors' funds, and provide them with a 100% guarantee of offer value, as well as a 15% return on their investments – and that's without taking into account the profit, and growth, of the Token market, which are added benefits that every RLD holder will get to enjoy."

ABOUT The RLD Token

Real Land is a cumulative effort of a group of many Real Estate companies to connect every citizen of the world with all kind of profitable Real Estate Units across the globe. Real Land has just Tokenized all its Real Estate Units, to create smaller Units, that make part of all its sub-projects, helping anyone interested take advantage of secured Real Estate investments, with sustained growth. At Real Land, we carry out thorough research, prior to choosing the Units that we include in the Tokenization process, ensuring that the value of each particular investment will grow faster than any other potential investment of the same kind. Furthermore, through providing an offer-value guarantee, we safeguard investors' hard-earned money against Token-price fluctuations. RLD also provides its Unit holders a great chance to buy or convert any Units from RLD in to a real home, villa, shop, and any other one of the available Real Estate Units.

Growth Potential

The RLD is the base currency of Real Land's IPO platforms. After launching the RLD Token in our proprietary platform, we expect that its trading volume will amount to billions of EUR, on a monthly basis. It is expected that the token's demand will grow with each new user wishing to buy one of the available Real Estate Units. As a growing number of users will join, and purchase, Real Estate Units using the RLD Token, Real Land will continue buying RLD Tokens, at the current exchanges given at any single point in time, to sell Real Estate Units to its new clients. Alternatively, users will be able to buy RLD Tokens directly from Real Land, at current exchanges given at any single point in time, in order to buy, or Convert RLD to a house or villa – a move which will result in the RLD Token's price growth. The RLD Token supply is limited, while its demand is yet to be established, since there are billions of potential RLD Token users, and hence billions of potential RLD buyers, from all around the world.
