

Rekze Laboratories unveils most complex anti-hair loss and hair-growth stimulating line of products

Thursday 11 August, 2016

Media:

Rekze Laboratories Ltd, a privately held-boutique company, has launched its line of hair care products dedicated to stimulate hair growth and fight against hair loss. With this launch Rekze Laboratories Ltd makes the first step in its quest to become a leader in the beauty and hair care industry.

Rekze Laboratories Ltd has united a team of experts in dermatology to create the most complex hair growth formula by using a high technology innovation process that can prevent hair loss from worsening and help stimulate your scalp naturally to boost blood circulation and better nourish hair follicles.

The company has developed some of the most unique products on the market by using the latest advancements in biotechnology to deliver results through non-prescription over-the-counter hair care products. The line of anti-hair loss and hair growth stimulating products consists in the '63' shampoo, '43' conditioner, '24' treatment serum, and '28' scalp cleaning wipes.

No harsh chemicals

The ingredients in Rekze Laboratories' products help reducing toxins that might cause hair to become brittle and thin enhance the scalp's ability to support the growth of healthy hair that is less susceptible to breakage and falling. There are no harsh chemicals in the products' blend, making them desired for hair loss prevention, a problem that affects many people today. The formulation is developed completely without the use of Sodium Lauryl Sulfate and Sodium Laureth Sulfate, low cost detergents in shampoos and cleansers that are linked to skin irritation, drying, and hair loss due to follicle attack.

'63' shampoo combines over 63 ingredients known to stimulate hair growth and reduce hair loss by treating the entire scalp. '63' frees the scalp of blockages, build-ups, and debris, resulting in your healthiest hair and scalp possible.

'43' conditioner combines over 43 ingredients to provide hair resilience and control moisture balance for the entire scalp. The ingredients in this lightweight conditioner stimulate hair growth and reduce hair loss.

'24' treatment serum uses advanced technology to treat the entire scalp not only the vertex, by combining over 24 ingredients to help treat hair thinning and hair loss, maintaining scalp vitality and act on follicle dysfunctions to obtain optimal results in a short period of time.

'28' treatment wipes, the first wet wipes on the market specially designed to clean and nourish the scalp, combine over 28 ingredients to clean and to help treat hair thinning and hair loss, and fight against thinning or shredding hair.

Because the satisfaction of its clients is fundamental and the company wants to improve continuously and further develop its products, Rekze Laboratories decided to celebrate the launch of its hair care line by offering its clients free kits consisting in the entire set of products for those submitting their reviews.
