Rental Shortage in the UK Persists: Progressive Property Takes Action

Thursday 18 May, 2023

London, UK - May 18, 2023 - The United Kingdom continues to grapple with a severe shortage of rental properties, impacting the country as a whole. Alarming new figures highlight the detrimental effects of this crisis on the housing market and the overall economy.

Recent data reveals the following concerning trends:

1. Decreased Availability: Since 2019, the number of properties available for rent has plummeted by a **staggering 38%**.
2. Rising Rental Costs: The average rent has experienced a significant **increase of 5.2%** since 2022.

This persistent shortage not only contributes to the continuous rise in inflation but also exacerbates the housing crisis. In spite of these challenges, the government's approach appears to be focused on undermining landlords, further exacerbating the problem.
