

Revolutionizing City Trips: AI-Powered Wetime Launches Kickstarter to Expand to Over 200 Cities

Tuesday 24 January, 2023

Wetime's AI-powered city trip planner offers a range of features that make planning your next trip easier than ever before.

Accommodation options: Wetime provides personalized recommendations for hotels, hostels, and vacation rentals, based on your budget and preferences.

Food and drink suggestions: Our AI takes into account your dietary restrictions and preferences to recommend the best restaurants, cafes, and bars in the city.

Things to do: Wetime's AI suggests a wide range of activities, from popular tourist attractions to lesser-known gems, based on your interests.

One of the key benefits of using Wetime is that it saves you time and effort when planning your trip. Instead of spending hours researching accommodation, food, and activities, Wetime's AI does the work for you, providing you with personalized recommendations in minutes. This improves the time spent of travelers to find and plan their trips faster, which is the main goal of Wetime.

Additionally, Wetime's AI technology is constantly learning and improving, meaning that the more you use it, the better it gets at understanding your preferences and providing you with the most relevant recommendations. The algorithm is written in-house by our team led by Co-founder Sietse Schelpe, ensuring that our technology stays at the forefront of innovation. We are proud to be supported by AWS Startup Loft by Amazon, which gives us access to the resources and expertise we need to continue developing and improving our technology.

"Wetime is the perfect tool for travelers who want to plan their trips quickly and easily, without sacrificing personalization," said Marloes Decraemer, Co-founder of Wetime. "Our goal is to help travelers to plan their trip faster and more efficiently, and with Wetime, we've created a solution that does just that."

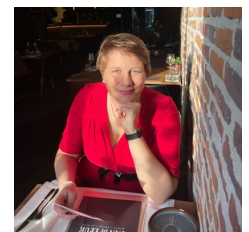

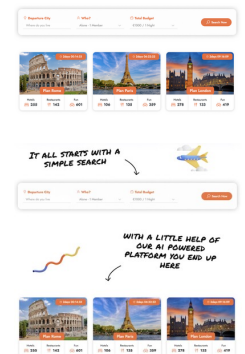

In addition to helping travelers plan their trips faster and more efficiently, our Kickstarter campaign also aims to support hotels and other accommodation providers in improving their service to guests. By partnering with Wetime, hotels can benefit from our AI-powered recommendations and personalized suggestions, helping them to attract and retain customers. We believe that by working together, we can create a win-win situation for both travelers and accommodation providers.

As part of our Kickstarter campaign, we're offering a range of rewards for backers, including extra options on Wetime platform, like saving their plans, adding own locations, free data included in the plan. By supporting our campaign, you'll not only be helping us to expand our coverage and improve our technology, but you'll also be getting access to a range of exclusive benefits.

Our goal is to bring Wetime to more than 200 cities and making it available for more travelers. With your support, we can make this a reality and revolutionize the way people plan and experience their city trips.
