Saving the Pub Will Require 124 Pints Per Adult

Monday 17 May, 2021

Company Debt's latest research assesses how many pints per British adult would be required to make up the 25.66bn deficit incurred by the food industry since the start of the COVID-19 Pandemic.

The answer is 124 pints per adult (or 122 glasses of wine, 40 roast dinners or 976 packets of crisps!)

The research is neatly compiled into a FREE PRINTABLE POSTER FOR PUBS, which should certinly get conversations going around the bar as pubs reopen today.
