

Scorpion Vision Moves to High Tech Facility

Monday 19 September, 2016

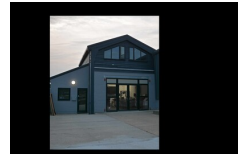

Scorpion Vision Limited is delighted to announce their recent move to a state-of-the-art building in Lymington, Hampshire which has been purpose built for their requirements.

The office complex now provides a dedicated laboratory and workshop equipped with automation systems for building prototypes and testing cameras. A PLC and three meter conveyor provides a superb test rig for this vital work, plus a robot cell available both to test and demonstrate integrated vision solutions for numerous vision guided robot applications.

The upper floor is dedicated to a series of office suites and boardroom for customer and supplier meetings.

Paul Wilson, Managing Director of Scorpion Vision commented, "We are delighted with our new office facilities as they offer us the flexibility to have a full testing environment for a wide range of bespoke applications that we develop for our clients. Furthermore, we now have the capacity to welcome partners and other key suppliers to collaborate on vision related solutions using our on-site equipment."
