SpaceBiz Launches in the UK, Introducing an AI-Powered Venue Matching Concierge Service

Wednesday 19 August, 2026

Powered by SpaceCloud’s database, the service offers AI-driven venue matching for corporate and private events.

- Curated network of premium London venues with tailored corporate concierge support.
- AI-powered venue recommendations based on budget and headcount, with additional searches beyond the database.
- One-stop support from quotes to payment, reducing time and effort for corporate event organisers.

Finding corporate event venues across the UK and Ireland is set to become much easier. SpaceCloud UK has officially launched **SpaceBiz**, an AI-powered venue matching platform. SpaceBiz offers venue matching services for a wide range of events, including corporate meetings, conference halls, workshops, and private events such as weddings and celebrations.

The venue sourcing process can often involve significant time and effort, with event organisers required to contact multiple venues, compare options, and coordinate booking arrangements. SpaceBiz simplifies this process by combining AI-powered matching technology with a dedicated concierge service, delivering a faster and more streamlined way to find suitable venues

SpaceBiz seamlessly integrates a data-driven **"AI Matching Engine"** with a **"Dedicated Concierge Team."**

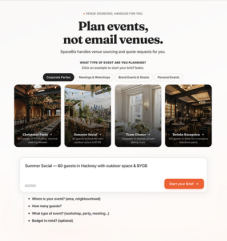

- **End-to-End Booking Support:** From **Venue Search ?? Quote Negotiation ?? Invoicing ?? Final Payment**, SpaceBiz supports the complete booking process through a single platform, reducing the time and effort required to organise an event.
- **Fast & Intelligent Matching:** The AI matching engine analyses each request to provide suitable venue recommendations from its database. If no suitable option is available, the dedicated concierge team provides personalised support to find the right space.

A key benefit of SpaceBiz is the ability to receive and compare multiple venue options and quotes in one place. Event organisers can review spaces based on their requirements, budget, and capacity, while managing the entire booking process through to online payment.

“SpaceBiz combines AI technology with local expertise to help event organisers find the right venues faster and more efficiently. This launch marks the beginning of our journey to enhance the venue sourcing and booking experience across Europe, starting from the UK,” said the SpaceCloud UK team.

To mark the launch, SpaceBiz is offering exclusive discount vouchers for new users. Visitors can learn more about the service and submit venue matching requests through the official website (www.spacebiz.ai).
