Spotlight on John Weiss & Son trusted brand; Ellex iTrack

Friday 19 July, 2019

Harlow, UK – 19th
July 2019 - John Weiss & Son, the leading manufacturer and distributor of gold-standard ophthalmic micro-surgical instruments and procedures, is proud to be the sole UK distributor for the Ellex iTrack canaloplasty microcatheter.

Intelligently designed and meticulously tested across each treatment stage, the iTrack surgical system is a minimally invasive approach that allows the physician early intervention, whilst maximising patient quality of life.

The iTrack surgical system comprises the iTrack microcatheter, the ViscoInjector viscoelastic injector and the iLumin illumination source. It is a crucial element in the success of ABiC and Canaloplasty surgery. Using the unique, proprietary illuminated tip, you can monitor its progress through every procedural step. The tip is also lubricious and atraumatic, which means that ease of insertion is enhanced and direction accuracy is maximised to prevent the catheter broaching the collector channel ostia.

An internal guide wire within iTrack provides excellent tactile feedback as the tip is advanced, offering a vital insight on whether the canal is tight, grainy, or completely open.

ABiC performed using Ellex's iTrack surgical system comprehensively and successfully addresses all aspects of potential outflow resistance. It is a minimally invasive glaucoma surgery that allows you to lower IOP and/or reduce the patient medication burden, both in cases of controlled and uncontrolled glaucoma - maximising efficacy and minimising tissue trauma.
