Spotlight on the Lacrivera range of products for the treatment of dry eye

Monday 9 December, 2019

Harlow, UK – 9th December 2019 - John Weiss & Son, the leading manufacturer and distributor of gold-standard ophthalmic micro-surgical instruments and procedures, is proud to be the Authorised UK Distributor for the Lacrivera
range, an innovative portfolio of products for the treatment of dry eye.

Lacrivera is a World-leader in the production of solutions for dry eye. The flagship VeraPlug range is a punctal occlusion system that is designed to provide simple and effective treatment for dry eye disorders. Available in four sizes, it conforms perfectly to the puncta for unparalleled retention and boasts a low-profile dome for enhanced patient comfort.

The VeraPlug Flow is designed to provide a simple and effective means of slowing tear drainage. The inner channel reduces but does not eliminate tear flow, providing only partial occlusion. This is ideal for patients who experience epiphora with standard permanent plugs

The VeraPlug FlexFit is designed for simple sizing, patient comfort and retention. Available in four sizes, the FlexFit nose design provides easy insertion and superior retention with a low-profile dome for excellent patient comfort.

VeraPlug, VeraPlug Flow and VeraPlug FlexFit are available individually packaged and pre-loaded on a sterile, disposable inserter for ultimate convenience. They are also available in non-sterile bulk packaging for increased value.
