

Stay Connected With The 4G Enabled Huawei E5372 Mobile Wi-Fi, Available Now On Three

Tuesday 8 April, 2014

The new Huawei E5372 mobile Wi-Fi device on Three provides 4G speeds where available, making affordable browsing on the go even faster, and is now available in-store or online.

The Huawei E5372 is available on either a monthly rolling contract or for a one-off upfront cost of £49.99 on a 24 month contract, at £23.16 per month for 15GB of data or £15.99 per month for 5GB data. Alternatively you can buy it for £89.99 on Pay As You Go with 1GB of data pre-loaded.

This secure 4G mobile Wi-Fi device provides a portable hotspot for up to 10 Wi-Fi enabled gadgets that can be connected to it at the one time and they don't have to be plugged directly into it. It can simply be kept in your bag while you use your tablet, laptop or other gadget on the go.

We know there are multiple opportunities to use unsecured public Wi-Fi connections in coffee shops and hotels but they often require one-off payments to use and connection speeds can be slow due to the amount of people accessing them. With this handy mobile Wi-Fi device you can ensure you have your own personal hotspot wherever you are and feel safe, knowing that your own secure connection doesn't compromise any of your personal details when connecting to things such as mobile banking, where privacy is paramount.

The device is handy even when abroad but it is important to ensure you safeguard against bill shock by setting appropriate data or monetary limits on your roaming spend. However if you are in one of Three's Feel At Home countries* you can get online and make the most of your allowance without worrying about roaming charges as it costs the same as it would in the UK, even in the USA and Australia.

The Huawei E5372 4G mobile Wi-Fi also shows battery level, network signal and mail alerts, and has up to six hours of battery life.

Key features:

- Create a secure Wi-Fi hotspot wherever you need it, with 4G access where available
- Connect up to 10 Wi-Fi gadgets at the same time
- Connect your Wi-Fi tablet, laptop or games console at the press of a button
- Get up to 6 hours battery life
- LED screen displays battery consumption, network signal and mail alerts
- Web User Interface for Mobile Wi-Fi settings and mails

*Feel At Home currently includes 11 countries: USA, Austria, Australia, Denmark, Hong Kong, Indonesia, Italy, Macau, the Republic of Ireland, Sri Lanka and Sweden
