Studio45 Supports Startup Businesses With Digital Marketing Outsourcing

Sunday 14 June, 2020

Every startup needs to strengthen its roots in the industry. Studio45 (an award-winning SEO agency in India) is supporting all startup businesses through outsourced digital marketing services with affordable pricing to overcome startup businesses' challenges and to enhance their marketing strategies.

As per Studio45, having professional digital marketing support is a big step for a startup, as it includes various traffic-increasing services such as SEO, email marketing, content marketing, and **social media marketing**.

Any startup can get numerous benefits from an experienced and highly professional digital marketing team.

Some of the benefits include: ?

- Low risk factor

A specialized SEO and SMM outsourcing agency – like Studio45 – has a full-fledged team of paid marketing experts who are experienced and the best at their jobs. Professionals can build and operate a well-planned campaign to maximize outreach and minimize failure risk.

- A visible increase in ranks and conversions

Almost 71% of new businesses (source: https://www.profoundry.co/startup-digital-marketing-survey-results/) lead without any manuscript about digital strategy. Studio45 offers to build a results-oriented strategy that includes the tracking and reporting of conversions and the results to achieve better ROI analysis.

- Multichannel marketing

Professionals will not stick to only one social media channel. There are dozens of platforms, e.g. Facebook, Instagram, etc. By using multi-channel online marketing, sales can be multiplied.

- Leverage offshore perks

New businesses in Tier 1 regions such as the UK, US, and Australia suffer a lot to invest in an in-house marketing expert team because of the high cost of hiring and providing resources. If a company finds a better outsourcing partner in Tier 2 or 3 countries (such as India), it could offer great savings in their digital marketing venture.

Approximately 305 million new businesses enter the marketplace annually, and only 3,173 companies succeed to accelerate their businesses. (source: www.get2growth.com/how-many-startups/) Out of 3,173 companies, only 182 companies will exist (source: https://get2growth.com/how-many-startups/) in the long run.

The biggest reason behind such massive failure is that 37% of business owners try to do digital marketing on their own (source: https://www.profoundry.co/startup-digital-marketing-survey-results/) without any experience.

Introduction:
