01 September 2017 – Tara Tripp Hearing Care, based in Oxford, has pledged their support of the British Tinnitus Association (BTA) by becoming a Corporate Member of the charity, helping to raise awareness of tinnitus and to support the BTA's services helping those affected by the condition.

The BTA is the only national UK charity solely dedicated to those with tinnitus - a term that describes the sensation of hearing a noise in the absence of an external sound. For the last 35 years the charity has supported the one in ten people in the UK who experience tinnitus and in particular the 10% of those with tinnitus who find it severely affects their quality of life.

Vincent Tripp, Practice Manager at Tara Tripp Hearing Care commented: "We are delighted the practice has become a Corporate Member of the British Tinnitus Association which enables us to further utilise the fantastic resources available from the BTA. We look forward to strengthening our partnership with the BTA over the coming years."

Helen Goldsby-West, Head of Major Giving for the British Tinnitus Association, said: "Last year, the BTA supported over 335,000 people. To do this, we are reliant upon the generous donations of our fundraisers and supporters, and contributions from Corporate Members like Hidden Hearing. We receive no government support and need to raise over £500,000 this year to continue our much needed work. The Corporate Membership scheme is a great way for organisations to demonstrate their commitment to our work and the wider tinnitus community. We are extremely grateful to Hidden Hearing for their backing in our endeavours."

Vincent added: "As an independent hearing healthcare practice we pride ourselves on the assistance and advice we give our clients. By supporting the BTA this only strengthens our support network for those clients suffering with tinnitus. A number of our clients use the tinnitus support groups and find them extremely helpful. The BTA has a wealth of resources that we have used throughout the years which both us and our clients have found extremely useful."

Editors Notes

About the British Tinnitus Association

The British Tinnitus Association (BTA) is an independent charity which supports thousands of people who experience tinnitus and advises medical professionals from across the world.

The BTA is the primary source of support and information for people with tinnitus in the UK, facilitating an improved quality of life. They aim to encourage prevention through its educational programme and to seek effective treatment for tinnitus through a medical research programme.

The support the BTA offers to 335,000 people per year who are affected by tinnitus is reliant upon the generous donations of their supporters and fundraisers. They receive no government support and need to raise half a million pounds each year to continue their UK wide support. Donations can be made via www.tinnitus.org.uk

The experienced team at the BTA understands the impact that tinnitus can have on the lives of those who experience tinnitus and those who live with them, so seeks to provide the most appropriate and expert advice and information free of charge – via a confidential freephone helpline on 0800 018 0527 and online at www.tinnitus.org.uk. The BTA can also post printed and audio information and advice.

Visit the BTA's Facebook page at www.facebook.com/BritishTinnitusAssociation and follow the BTA on Twitter at www.twitter.com/BritishTinnitus

About tinnitus

Not an illness or disease, tinnitus is a term that describes the sensation of hearing a noise in the absence of an external sound. The noise can have virtually any quality. Ringing, whistling, and buzzing are common, but more complex sounds may also be reported. Troublesome tinnitus can be very distressing for the affected individual, and issues may arise with sleep, concentration and mood. However, in many cases, subtle changes in people's environment can address these issues, and improve quality of life.

About Tara Tripp Hearing Care

Tara Tripp Hearing Care is a leading family run independent hearing practice. The practice has built an excellent reputation in Oxfordshire and the surrounding areas for providing a complete hearing healthcare service. From the provision of the latest digital hearing aids to effective microsuction wax removal, Tara Tripp Hearing ensures each client receives the care, attention and expertise to solve or manage their hearing impairment.
