

# Technological Breakthrough: Hallucination-Free Superintelligence Achieves 99.99% Strategic Accuracy – Germany Gains Permanent Strategic Superiority

Friday 9 May, 2025

Worms – The mAInthink GmbH has achieved a **technological breakthrough** that redefines the future of strategic decision-making: With the development of **StratePlan**, a hallucination-free superintelligence delivering **verified 99.99% strategic accuracy**, Germany secures **permanent technological**, **economic**, **and geopolitical superiority** – operationally deployable and scientifically validated.

This revolutionary system is the result of **over 15 years of dedicated research and development** by **Dr. Igor Kadoshchuk**, Chief Technology Officer and Head of Scientific Development at mAInthink GmbH. His vision: to bring strategic thinking to a new level of machine precision. Today, that vision has become reality.

At its core, StratePlan orchestrates a **continuous competition between five autonomous high-performance algorithms**. Acting as a supervisory intelligence, StratePlan analyzes their outputs in real time, selects the most effective course of action, or fuses multiple inputs into one **precisely calibrated master strategy** – capable of operating under extreme complexity with exceptional clarity.

#### Key performance features:

- Zero hallucinations
- No strategic ambiguity
- Documented 99.99% decision accuracy

"We didn't simulate intelligence – we operationalized it. The system's architecture, competitive design, and autonomous selection process ensure unparalleled strategic clarity," says Dr. Kadoshchuk.

#### CEO Outlook: A Hallucination-Free Future for Generative Al

"StratePlan is not just a breakthrough in strategic AI – it holds the key to solving one of the most pressing challenges in generative language models: hallucinations," explains **Sascha Rissel**, CEO of mAInthink GmbH.

"With the right interface – still under development – StratePlan could serve as a supervisory control layer for large language models such as ChatGPT. Early research suggests this integration could **eliminate hallucinations almost entirely**. While further investment and interdisciplinary research are required, the potential is transformative."

## About mAInthink GmbH

Headquartered in Worms, Germany, mAInthink GmbH is a DeepTech company focused on building high-performance, hallucination-free superintelligence for strategic use cases in politics, business, and defense. The company brings together leading expertise in AI research, cognitive system architecture, and applied strategic modeling.
