Terry Healy Group Ltd Plans £2m investment in new training academy and eco-energy centre in Scotland.

Tuesday 20 April, 2021

Terry Healy Group Ltd (THG) is delighted to announce plans to invest £2 million pounds (GBP) in the setup and operation of both an Elite Energy training centre and the delivery of energy-efficient measures through the Energy Company Obligation (ECO).

This exciting expansion will create a significant number of new full-time jobs and indirect employment opportunities within our areas of operation.

"I believe there is a significant business and moral case for investment in renewable technologies. There is also an immediate requirement for a local training centre that facilitates gas, electric, and renewable training courses for people looking to start a new career in the utility industry or for established professionals wanting to grow their skillset"

- Terry Healy, Managing Director.

This long-term investment represents an important strategic opportunity to offer additional training and re-training for existing tradespeople and those looking to upskill across Scotland. Our commitment to the government-funded ECO scheme and renewable heating solutions will further complement not only our existing and future client base but also the environment.
