The privacy policy is designed to ensure customers' anonymity. Every service the company provides is highly customizable. Besides, it is no problem staying in touch with a writer throughout the writing process.

## A Little Bit of Methodology

The questionnaire for the research was developed by experts from Essays Advisor. The platform was founded by William Grabe - the acknowledged reviewer of essay services. Apart from metrics to identify the best companies in the niche, students were asked to give their opinions on the platforms they have used. Thus, they shared their experience of interaction with the custom writing niche as a whole as well as with particular platforms. As a result, a sufficient array of data was accumulated with the aid of customers. Over 17 000 of them took part in the survey. Herewith, a sufficient number of international students was identified.

However, some sections of the research, such as the reputation assessment and Privacy Policy evaluation, required the sophisticated observations of the experts. Plus, the legal basis of each company was analyzed in terms of legislation in effect. Therefore, about 25% of platforms were excluded from the final rating.

During the assessment, each service got a particular number of scores depending on compliance with the aforementioned metrics. If this number did not reach the minimum allowable value, the company was rejected. "This comprehensive system was designed to select only the best essay writing services. And I think the experiment was fairly successful," - the expert said.

## To Sum Up

The insider from Essays Advisor has assured that the currently announced research is to be updated in the following years. They keep monitoring the best companies in the industry as well as the worst ones. Also, the expert underlined that the main purpose of such investigations is to keep all interested individuals informed on what is happening in the niche. “It cannot be perceived as the cultivation of contract cheating. It is rather a means to struggle with scam websites and improve customers’ awareness of the proper ways to upgrade their performance,” – says the insider.
