The Bar Amigos ® Turbulence Bohemian Crystal Wine Glass Range is really brewing up a storm!

Tuesday 3 May, 2016

The Bar Amigos ® Turbulence Bohemian Crystal wine glass range are innovative glasses which negate the need for decanting.

It is widely known that wine tastes better when it is given a chance to breathe but what if you cannot afford the time? These glasses can help!

The inside ribs of the inventive wine glass help with oxygenating the liquid to release the aroma and taste of the wine faster. The uniquely designed, special shaped wave allows you to gently twist and swirl the glass in circular motions for faster oxygenation thus removing the need for normal decanting which can take hours.

The long standing tradition of crystal production in the Bohemia region of the Czech Republic has a sterling reputation as one of the best in the world. This precisely formed Bohemian crystal glass with thin-walled stemware and a smooth rim provides a unique quality feel. The crystalline (lead-free crystal) provides a unique brilliance in transparency and, when coupled with its mechanical resistance, is a high quality, durable glass. The crystalline component of the glass ensures a high quality light diffraction due to the presence of barium oxide and this makes this attractive Bar Amigos ® Turbulence Bohemian Crystal wine glass really stand out in your cabinet.

Colin Betteridge, Director and owner of Bar Amigos ®, a CKB Ltd ® group company brand, said

"The Turbulence Bohemian Crystal wine glass range are very different to normal glasses. This inventive glass negates the need for separate wine aerators if you prefer an absolute no fuss approach. They are a real talking point at parties as the ribs in the glass are both attractive and with purpose! They really are a revolution in wine glasses"

The dishwasher safe Bar Amigos ® Turbulence Bohemian Crystal wine glasses are sold in a pack of two and come in three different sizes.
