The Harley Medical Group Reveals Top Treatments Favoured By Those Preparing For Fashion Week

Friday 13 September, 2013

Non-invasive maintenance for last minute fixes

The Harley Medical Group will be in the front rows of London's Fashion Week, for 13-17 September, as it shows off some of its most popular treatments.
Fashion Editors and PRs are booking in for a range of facial rejuvenation treatments, ahead of the long week of shows and parties.

"This is one of the biggest weeks for the British fashion industry, so everyone wants to look their best. Some feel they just need a bit of a pick me up, post summer, which is where we come in," said Bernadette Harte, Non-Surgical Training Manager, for The Harley Medical Group.

Founded in 1983, The Harley Medical Group is a leader in cosmetic surgery and laser & skin treatments with clinics throughout the U.K. offering the most up-to-date comprehensive range of treatments and services.

Nurse Bernadette said the impending approach of Fashion Week has caused a notable uplift in treatments for The Harley Medical Group's London clinics.

"When cameras are constantly snapping away, the attendees all want to look the very best they can. That's where The Harley Medical Group can help,"

Especially, in demand given the efficiency and minimal downtime, are treatments such as Line and Wrinkle treatment, Fast Action Skin Peels and Dermaroller that offer fresh, bright and more youthful looking complexions.
Fast Action Skin peels help to treat ageing, acne or sun damage skin encouraging stimulation of collagen and elastin to rejuvenate the skin and make it look plumper, smoother and healthier.

Dermaroller can help to reduce the appearance of fine lines, pigmentation and acne scars. It stimulates the skin to repair itself, creating a thicker and healthier appearance with very little time required.

"Other popular procedures include Laser Hair Removal, Line and Wrinkle Treatments and Thread Vein Removal," Nurse Bernadette adds.

Laser Hair Removal is a quick yet gentle way to remove unwanted hair, including ingrown hair, often permanently. The procedure is virtually painless and with the state of the art lasers, The Harley Medical Group are able to treat all skin types and hair colours.

Line and wrinkle treatments can reduce the appearance of ageing. A purified protein prevents fine lines and deep wrinkles from appearing by relaxing the contracted muscles without affecting untreated areas. The affected muscles get "re-educated" so more time can elapse between treatments.

Thread Vein Removal provides improved confidence for blemish free skin. They take only about 45 minutes and complete results are seen after only four or five sessions.
